# Genetics Punnett Squares Practice Packet

**understanding genetics: punnett squares - wku** - understanding genetics: punnett squares ... punnett squares name: \_\_\_\_ fill in the following punnett squares with the genotype information given for both parents. (either parent's information can go on the top or the left side.) dominant genes are always capital letters and are listed first. **harry potter genetics (punnett squares)** - • punnett squares allow you to make predictions about the likelihood of traits in offspring. • 4 squares = each square represents 25% (adds up to 100%) • add them up to get probabilities / make predictions mm:  $1/4 = 25\%$  **name: date: block: genetics packet ~ punnett square practice** - a. draw punnett squares for each couple (you may need to do more than 1 square/ couple) baby 2 must belong to the browns because mr. brown is the only parent with an allele to contribute... then the rest works out as follows: b. to which parents does baby #1 belong? why? hint you may want to refer to your punnett squares. **punnett square cheat sheet - greeleyschools** - punnett square cheat sheet below is a sampling of punnett square problems that you will be expected to solve. in order to do this, you will also have to understand the meaning of the terms below. **genetics: punnett squares practice packet bio honors** - genetics: punnett squares practice packet bio honors most genetic traits have a stronger, dominant allele and a weaker, recessive allele. in an individual with a heterozygous genotype, the dominant allele shows up in the offspring and the recessive allele gets covered up and doesn't show; we call this complete dominance. **punnett dna stations unit: genetics - marist college** - +materials: spongebob genetics directions (differentiation activity) flip a coin.heads= dominant tails= recessive record the genotype received fro each trait draw a picture to show the phenotype of your spongebob choose a group member to mate your spongebob with and create punnett squares to show the possible offspring. **punnett square practice worksheet** - punnett square practice worksheet 1) for each of the genotypes (aa, aa or aa) below determine what the phenotype would be. ... fill in these two punnett squares to illustrate the crosses for your possible male genotypes (from question 9) with the deaf female dog. possible cross 1 % of possible genotypes: **bikini bottom genetics name - bioeyes** - bikini bottom genetics name \_\_\_\_ scientists at bikini bottoms have been investigating the genetic makeup of the organisms in this community. use the information provided and your knowledge of genetics to answer each question. 1. for each genotype below, indicate whether it is a heterozygous (he) or homozygous (ho). **genetics worksheet - bpi** - the five (5) steps associated with solving a genetics problem: if you take the time to follow the directions below, you will be able to solve most genetics problems. 1. determine the genotypes of the parents or whatever is given in problem. 2. set up your punnett square as follows: \*# sq. based on possible gametes that can be formed. **use your knowledge of genetics to complete this worksheet.** - use your knowledge of genetics to answer the questions below. (a) if spongegerdy's father is a heterozygous squarepants and her mother is a roundpants, what is her genotype? complete the first punnett square to show the possible genotypes. based on your results, what would gerdy's genotype have to be? ...
