
Homo Sapiens

homo sapiens - wikipedia - in taxonomy, homo sapiens is the only extant human species. the name is latin for "wise man" and was introduced in 1758 by carl linnaeus (who is himself also the type specimen). extinct species of the genus homo include homo erectus, extant during roughly 1.9 to 0.4 million years ago, and a number of other species (by some authors considered subspecies of either h. sapiens or h. erectus).
